NOW FIVE TEAMS
IN COUNTY LEAGUEMonongah Outlaws Want to
Try for West Virginian
Cup.The teams which will compose the
county league was brought to five this
morning when the following letter was
received from Manager Leeper, of the
Monongah Outlaws:MONONGAH, W. Va., April 16.—
[Sporting Editor, The West Virginian.]
—I saw your notice in the West Vir-
ginian wanting baseball clubs to or-
ganize a county league and as we are
interested we would like to join. We
assure you a good ball club.MILLARD LEEPER, Mgr.,
Monongah Outlaws.The teams which have already sig-
nified their intention of being in the
league, and battling for the county
championship and the West Virginian
cup, are: Grant Town, South Side In-
dependents, Baxter, Eighth Ward In-
dependents and Monongah. It is ex-
pected that three or four other teams
will be heard from in the next two days
and possibly a meeting can be arrang-
ed in a Sunday or two.

Solar Surface Temperature.

The latest estimate of the absolute
temperature of the solar surface is
that of F. Biscoe of Warsaw, whose
computation is based upon the in-
tensity of radiation for individual
wavelength in the solar spectrum as
observed with the spectro-heliometer at
the Smithsonian Astrophysical observa-
tory. He gets an average of 7,300 de-
grees plus 100 degrees Centigrade.LIFE WAS A MISERY,

SUFFERS GREAT PAIN."I have been troubled with my stom-
ach and pains in my back for over ten
years, also was bothered with indiges-
tion and had no appetite. Had tried
every known remedy without any re-
sult, so decided to try Kar-Nak and
was greatly relieved after taking one
bottle. My stomach trouble and pains
in my back have left me, my indiges-
tion relieved, and my appetite has im-
proved. I think Kar-Nak a great me-
dicine.""J. H. PEER,

Vegetables for Health.

The Greek philosophers believed
that a dish of boiled beets, served
with salt and oil, was an aid to men-
tal effort, and it is said that Pharaoh
fed his pyramid builders on radishes.
The Arabians have always eaten arti-
chokes for liver trouble and in differ-
ent parts of the world they are re-
garded as particularly wholesome for
men and women who lead a sedentary
life.

Soap as Germ Destroyer.

Lately medical science has been try-
ing to find out to what degree the
chemical action of soap can be de-
pendent upon as a destroyer of germs.
Professor Symes, after experiment-
ing with many varieties of soap,
declares that "all soaps possess anti-
septic properties in some degree, and
that any germs rubbed into soap or
dropped upon its surface are not cap-
able of multiplication."

BARNEY OLDFIELD READY FOR \$2,000-WAGER RACE!

Here's BARNEY OLDFIELD, famous race driver, shown with his famous smile and his famous cigar, just
as he was about to start on the trail of \$1,000.
Johnnie Powers, principal owner of the Los Angeles baseball team, bet \$2,000 that Oldfield, veteran steer-
ing wheel-twister, couldn't herd his car through to Indianapolis in ten days.
Barney took \$1,000 worth of Powers' wagers and Cliff Durant, who has also achieved considerable fame
as a grease-eater on auto courses, took the other thousand.
The picture was snapped in Los Angeles and shows Barney bidding goodbye to R. J. Firestone, the stake-
holder.

From Indianapolis Oldfield will go to Uniontown, where he intends to drive in the coming auto classic.

HEALTH HINTS

Deaths from cancer are increasing
in number each year. Statistics show
that unless better conditions of pre-
vention and cure can be established
several million people who are now liv-
ing in the United States will be de-
stroyed by this disease.Unlike tuberculosis, typhoid fever,
pneumonia and other diseases with a
high death rate, the specific cause of
cancer is not known.Cancer usually begins at a point
at which the tissues have been irritat-
ed for a long period of time. Exam-
ples are: The lip of the pipe smoker,
the neck of the stomach of persons
who have suffered from ulcer of this
region; the gall bladder containing the
gall stones.We know that nearly one half of all
cancers occur in the stomach and in-
testines, portions of the body in which
food that has not always been disin-
fected by heat is stored.Portions of the surfaces of the body
that are not protected by clothing and
are exposed to injuries and dirt are
almost exclusively subject to cancer.To avoid cancer one must there-
fore prevent as much as possible the
irritation of tissues in every part of
the body, exercise the utmost cleanli-
ness and eat only such foods as are
absolutely clean or have been made
sterile by cooking.Even after a cancer has started it
can be removed entirely without much
likelihood of its returning. Cancer in
the beginning is a local condition and

I. U. T.—"Is pyorrhea contagious?
Is it necessary to remove all the
teeth to effect a cure?"No. Extraction should not be resort-
ed to unless necessary, but may have
to be done in severe cases.

Marvelous Banyan Tree.

The giant banyan under which Alex-
ander is said to have camped with
7,000 men, now measures nearly 1,000
feet across the head, contains about
3,000 trunks and forms a dense can-
opy through which the sunshine never
penetrates. Several other species also
propagate in like manner.

FAIRMONTAn unusual interest in agriculture
is evident all over the country and
more interest in gardening and the
production of food stuffs is being manifest
by the coal companies this year than
ever before. Practically all of the com-
panies are utilizing their surplus land
for the production of vegetables and
are encouraging and assisting their
employees in the cultivation of individ-
ual gardens. The Consolidation Coal
company is leading in this work by
virtue of their more extensive organi-
zation but the other companies, chief
among them the Hutchinson, the Hite
and the Clark companies, are doing
their share towards cutting down the
"h. c. l." for their employees. The Hite
company is preparing to plant a great

companies named have extensive areas
under cultivation.A number of "Prestolite" tanks have
been procured by the Fairmont Auto
Supply company for exchanging with
the Monongahela Valley Traction com-
pany. These tanks contain a gas which
is used for illumination on some auto-
mobiles not equipped with electric
lights, and as the flame is very hot
it is also used extensively for welding
and various kinds of metal work. It
is for the latter purpose that the Trac-

are not sold but are exchanged for
empty tanks which are returned to the
factory for refilling.

May Be a Hairless Race.

The hair growth on various parts of
the body is regulated to perform a
specific purpose. When we tamper
with this growth for centuries we de-
velop new forms. Perhaps this is why
baldness is a modern affliction, en-
tirely unknown in primeval periods.
Eventually the human race will prob-
ably be denuded of all hair.
